

ALL BURMA FEDERATION OF STUDENT UNIONS (ABFSU)

Date : 1st March, 2021

The Nationwide Emergency Conference of Students was held by All Burma Federation of Student Unions (ABFSU) on 28th February 2021, and the following Nationwide Emergency Special Conference press statement was issued.

1. We, the members of ABFSU, bow in respect to the martyrs who gave their lives in the people's fight for true Democracy and annihilation of Dictatorship. Your deeds will ever be remembered in the History of Burma. Proudly flying the flag of ABFSU, which is colored with the blood of every martyrs, we guarantee that we will continue the people's fight for Democracy till we win.
2. ABFSU takes part in the people's fight holding the four principles: the elimination of Dictatorship; perpetuation of Democracy; abolition of 2008 constitution; and the release of all people arrested and detained. Based on these principles are we trying to be politically united with all national races and classes of the people within the country.
3. The members of ABFSU in their respective areas are managing the required measures, which are to be able to systematically protect ourselves, so as to have the minimum injuries and loss of lives while the fascist army opens fire to the people. We call on the people to join with ABFSU. The Fascist army is scattering the people's strikes in such a cruel way that they were in the battlefield. It is therefore imperatively needed for the people to devise the necessary plans to protect ourselves from the loss of lives and serious injuries. This does not mean the people start the violent actions toward the armed terrorists, it is just meant that towards the brutal attacks should the people systematically respond regarding minimum losses. As we have delegated the tasks within the members to make necessary actions and the people need to defense together with the students.
4. Refusing the military rule, ABFSU calls upon the people to begin the plan of regional autonomous rule, along with the voices of the residents. It is required to have an independent management of the people which is free

from military rule. The nature of national administrative mechanism comes from the central government to the most basic and smallest parts of the administrative body: at the wards and at the villages. Should the people build their own autonomous ruling system at the base of the administrative body can we cease the military rule. We finally request the people to strongly withstand the various kinds of repression committed by the military when they brutally apply to us. We, ABFSU, will be with the people.

Federal Democracy can only be perpetuated with the power of the people. Annihilating the dictatorship, we, ABFSU, is fighting for Democracy in the light of the Federal Democratic Union, with all the national races and classes of the people of Burma.

Military Dictatorship must come to an end.

People's fight for Democracy must clinch a victory.

Revolution must succeed.
