

## Statement

We've seen the U.S Government Sanctioned on six entities and two individuals that have enabled the terrorist Junta continuing atrocities, including through the importation, storage, and distribution of jet fuel to Terrorist Junta in March 2023. Counselor Chollet was talking about when he told Indonesian press earlier this week that the next round of sanctions would be targeting junta revenues. This sanctions set clearly does not touch revenues in any way, especially on Myanmar Oil and Gas Enterprise. U.S Government have known that MOGE is the life-blood of Junta's atrocity crimes in Myanmar. Inaction on sanctioning MOGE means that enabling terrorist Junta to be continuing the atrocity crimes and undermining the pro-democracy movement of Myanmar. ***We would like to know why U.S Government do not hear the voices of Myanmar People and how many dead bodies need to sanction against MOGE?***

We, People of Myanmar will be continue to pressure the U.S Government to act sanction against MOGE.
