<i>Total</i>	<b>223110</b>	<b>349190</b>	<b>572300</b>

<sup>1</sup> In order to cover the updates in Buthidaung and Maungdaw townships, the timeline for the IDP population has been extended for one week until May 20, 2024.

## Section-I

The HDCO releases regular reports and updates concerning the ground humanitarian situations in Arakan. The armed clashes in Arakan have been dragging on for more than six months now and show no sign of abating. Meanwhile, the number of civilian casualties, arbitrary detainees and IDPs is only increasing. The current report covers the data regarding the civilian casualties, arrests, and IDP population from November 13, 2023, to May 13, 2024.

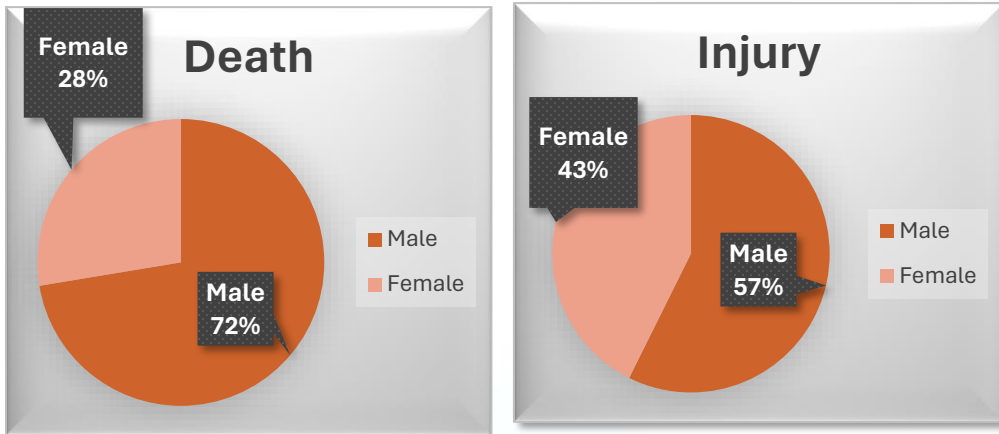

As of May 13, 2024, the HDCO reported that at least 268 innocent civilians were killed while another 640 were injured. Therefore, the total number of civilian casualties increased to 906. Besides, 425 individuals have also been arrested since the beginning of the current armed clashes, and the lives of the arrested civilians in the hands of the junta authority are under grave threat. Due to the ongoing armed clashes and lack of phone and internet connection, the HDCO can only describe the reported number of cases. It means there could be a slight change when a more robust data collection task can be performed.

In terms of the situation of IDPs, the total number has exceeded 572,300 with both old and new IDPs included. But only less than 20 per cent of that population has been able to receive humanitarian assistance. The vast majority of the IDPs are taking shelter in the homes of their relatives. Still, they are the same vulnerable IDPs in dire need of urgent assistance since their host relatives can hardly bear the burden of feeding them any longer. This update aims to provide fresh data and information on the atrocities committed by the junta against innocent civilians and for more efficient and effective delivery of humanitarian assistance to the IDPs and other vulnerable populations.

#### A.2) Conclusion

At present, around 80 per cent of the IDP population is in dire need of emergency humanitarian assistance. The IDPs even in relatively stable central Arakan are still subjected to airstrikes, drone attacks, and artillery shelling by the junta armed forces deliberately targeting them. The conditions in the shelters housing the IDPs are highly horrific with no human dignity.

At this juncture, it is crucial for all humanitarian actors to note that the junta forces have been targeting civilian objects including medical infrastructure making it impossible for the already highly vulnerable people to seek medical treatment. In some cases, there are no more hospitals or clinics left for emergency hospitalisation. Innocent civilians who live in the relatively stable areas in central Arakan also often face the loss of lives and bodies due to the unintended mine explosion intentionally planted by the junta soldiers when they retreated.

Of greater concern, the monsoon season is approaching now, and the internally displaced persons (IDPs) are woefully unprepared. The residents of Arakan experienced the devastating impact of Cyclone Mocha last year, and the potential for a similar disaster could lead to an unprecedented humanitarian crisis.

The current humanitarian needs for the IDPs in Arakan include not only secure and safe shelters and food but also life-saving medicine and nutrition supplements, particularly for children and

mothers. The newly born babies and infants in the ULA-controlled areas are in immediate need of vaccinations and immunisation support.

HDCO has reiterated the **six key emergency humanitarian priorities** as described the previous reports.

- 1) Food Security
- 2) Medicines and health-related facilities
- 3) Shelter
- 4) Reconstruction of Houses
- 5) Livelihood Assistance
- 6) Demining Equipment for Civilian Resettlement.

Therefore, we would immensely appreciate any assistance from individuals or organisations and we would like to invite them to cooperate with us in the delivery of emergency cross-border humanitarian aid.
